

Applications Developer/Analyst

Elliott Tool Technologies is looking for talented people who are passionate about work and solving customer challenges in a fast-paced, high energy work environment, and who are looking to further their knowledge and skills.

Why Choose Elliott Tool?

- You will be part of an exciting and fast-paced industry. You'll be helping our internal customers support our external customers by your technical expertise.
- You will be successful. We will provide you with comprehensive training and the tools necessary to succeed and reach your full potential.
- You will grow. We will provide you with mentorship and an organizational structure that provides continuous learning opportunities.
- You will be part of a culture that values integrity and mutual accountability, a culture where people are passionate about their work and share a common vision—"Quality specialty tools for an "I need it yesterday world."
- You will be part of a company that values family and supports a healthy work-life balance.
- You will have stability. You will be joining a profitable company with a 125 year track record of innovation and success where many of our Team Members choose to stay and grow. Our average tenure is 12 years.

As an Application Developer/Analyst, you'll be driving excellence in 3 areas:

- **Application Development**
 - Understand departmental requirements and how they translate in application features.
 - Provide Desktop User and application support for internal business partners.
 - Write high quality source code to customize existing applications within deadlines.
 - Ensure 99.99% uptime of the information technology systems that Business Development utilizes, including tech support for users.
 - Test, troubleshoot and debug applications.
 - Evaluate existing applications to reprogram, update and add new features.
 - Possesses working knowledge of Mac OS, Windows 7, 10, and Windows Server.
- **Web Development**
 - Write well designed, testable, efficient code by using best software development practices.
 - Develop and maintain dashboards, modules and customizations of web-based reporting tool and CRM, utilizing JavaScript, PHP, and Rest API.
 - Integrate data from various back-end services and databases.
 - Gather and refine specifications and requirements based on technical needs.
 - Stay current with emerging technologies/industry trends and apply them into operations and activities.
