- Possesses working knowledge of Mac OS, Windows 7, 10, and Windows Server.

### **What's a typical day like?**

Imagine Marketing has identified the need for a new web-based tool that will allow prospects to get pricing and availability directly from the website. The tool needs to provide fast, accurate information and easily connect to an Inside Sales Rep for questions or to place an order. Marketing's analysis shows that having this information available could double the sales leads generated from the web. Marketing schedules a morning session with you to review this idea and develop a scope for the project.

Later that morning, you consult with an IT Colleague about a modification to a Dashboard in the CRM system that has been requested by Business Development. You determine the project scope and what the modification entails. You develop and prioritize the task list with specific dates so the project can be completed on time and within scope.

That afternoon, you focus on developing a customized report that Sales requested. You clarify and confirm expectations of what they Sales Manager would like to see. You create the SQL query that feeds the report and format it appropriately. You run a sample report and send a copy to the Sales Manager for feedback.

At the end of the day, while reviewing your calendar, you receive an urgent call from the Inside Sales Manager. He informs you that the Sales Order Entry screen is not allowing him to save his Sales Order. Within 15 minutes, you investigate and discover that a record didn't save properly. You make an adjustment in the database that allows the order to go through and follow up with the Inside Sales Manager to confirm that there are no other issues.

**Every day you will be doing work that really matters. You will be helping internal customers solve their business challenges. You will have an opportunity to do your best work and make a real impact.**

### **We are looking for talented people. Do you have what it takes?**

- You are self-motivated, diligent, passionate about work, and always looking for more. You seek ownership, accountability and take responsibility for your actions.
- You are a team player. You are others centered. You are teachable, coachable. You are confident but you don't promote yourself. You are able to teach and coach others.
- You are emotionally intelligent. You have mutual respect with your peers. You have good judgment about other people. You interact appropriately with others. You are aware of the impact of your words and actions.
- You are process and results-oriented. You set and track goals. You do what you say you'll do and deliver on your promises. You achieve consistently good results.
